COTTON CHATS

DRAPER COMPANY, HOPEDALE, MASS.

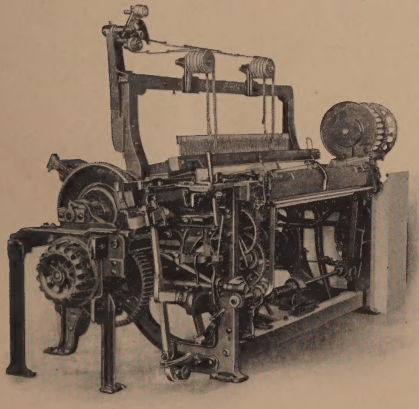
DRAPER COMPANY HOPEDALE MASS.

COTTON CHATS

NO. 79. APRIL, 1909.

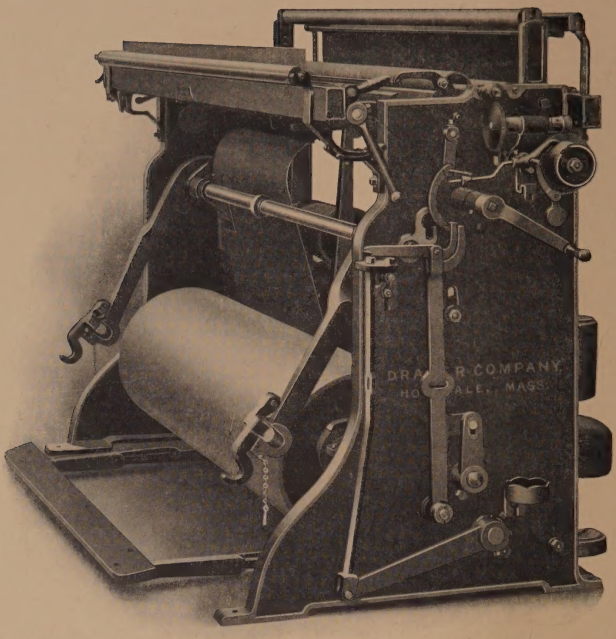
MEMBERS OF THE NATIONAL ASSOCIATION OF COTTON MANUFACTURERS

and others interested are invited to visit our space at exhibit of the **Textile Exhibitors' Association,** at Mechanics Building, Boston, the last week in April. We illustrate herewith a few of the attractions.



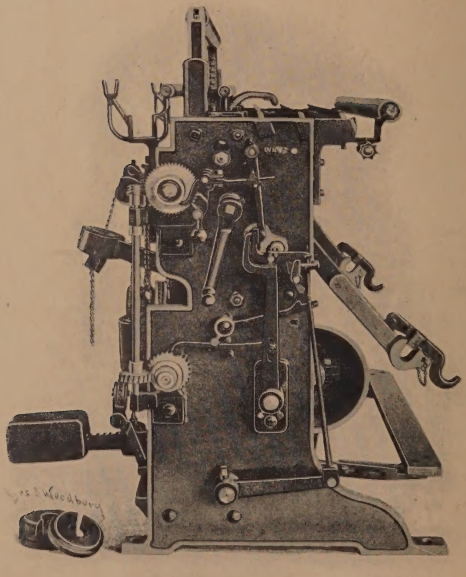
E Model Northrop Loom

Weaving fine goods from 80^{s} warp and 120^{s} cop filling.



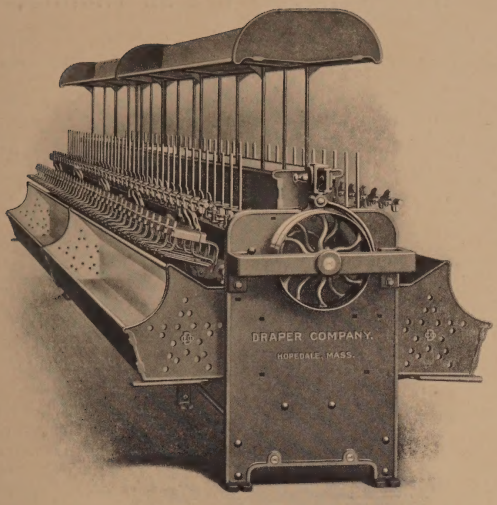
I Model Warper

For Coarse Work, will take beams with **32 inch heads.**



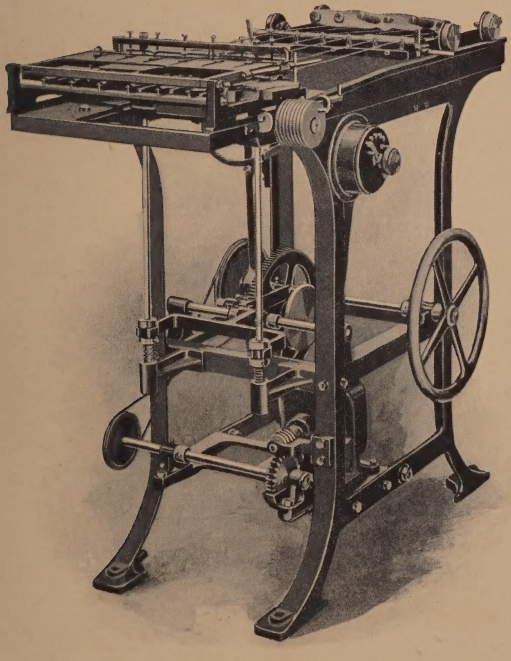
F Model Warper

For very fine work.



I Model Spooler

With new traverse motion and other improvements.

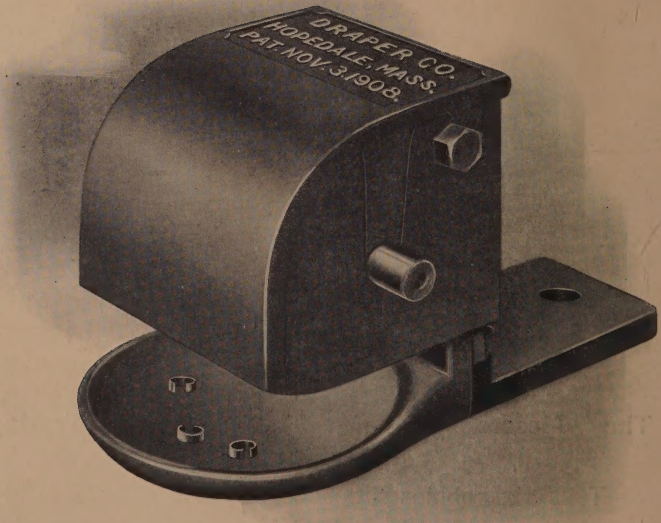


The Moscrop Single Thread Yarn Testing Machine

Tests six bobbins simultaneously and records eighty separate breaks from each. **Bring your own samples and see them tested.** We shall be prepared to test any numbers between 15^s and 90^s.

If your fingers are all thumbs,

why try to sort your travelers by hand?



Let Duckworth's Traveler Magazine do the work!
